

THE NAIROBI HOSPITAL

Career Opportunity

The Nairobi Hospital, a leading health care institution in Eastern Africa has an excellent career opportunity for an individual who possesses a passion for excellence, strong work ethic, results oriented and committed to continuous improvement. The successful candidate will be a team player with the ability to effectively add value to enabling good patient outcomes and shape best clinical and non-clinical practice in line with our Strategic Plan (2019-2024).

HOSPITAL PERFUSIONIST

REF: TNH/HRD/HP/05/2023

The overall purpose of this job is to attend to patients through clinical diagnosis acumen in line established protocols and the hospital's patient care objectives.

ROLES AND RESPONSIBILITIES

- Performs duties to support cardiopulmonary bypass; maintains and demonstrates competency in the performance of all responsibilities.
- Appropriate choice and use of disposable and heart-lung machine equipment and safety devices for the performance of CPB.
- Appropriate maintenance, according to hospital practice guidelines, of the patient's physiological parameters/variables during CPB.
- Prepares for surgery by assembling extracorporeal circuit, including connecting tubing, oxygenators, pumps and filters. Primes and de-bubbles circuit.
- Prepares, administers and monitors flow of prescribed solutions and medications including circuit prime, cardioplegia, and blood products used during procedures requiring extracorporeal support.
- Develops perfusion care plan and calculates appropriate perfusion formulae to be communicated during preoperative briefing.
- Manages extracorporeal circuits to achieve conditions ordered by surgeon, including CPB, deep hypothermic circulatory arrest (DHCA), coronary perfusion, veno-venous bypass, or partial bypass.
- Maintains supply of blood in system and makes any adjustments needed to achieve conditions specified by surgeon or anaesthesiologist, such as changes in blood temperature, oxygen/carbon dioxide ratio in blood, or patients' electrolytes.
- Receives and interprets blood gas values and assesses adequacy of perfusion. Adjusts and monitors heart-lung machine settings according to clinical practice guidelines for CPB.
- Monitors and maintains anticoagulation according to clinical practice guidelines for CPB.

- Disassembles extracorporeal circuits and mechanical components of the heart/lung machine and cleans all non-disposable items and disposes of contaminated materials.
- Records, updates and maintains permanent records of all cardiovascular bypass procedures.
- Participates in emergency operation of intra-aortic balloon pump during cardiac procedures.
- Prepares and manages extracorporeal support for complex vascular surgery, including descending aortic aneurysm repair.
- Prepares and manages blood conservation systems.
- Prepares and manages extracorporeal membrane oxygenation circuits for veno-arterial and veno-venous support.
- Maintains a working knowledge of appropriate equipment and strategies utilized for complex cardiothoracic and vascular surgery.
- Prepares and manages para-corporeal ventricular assist devices for patients requiring temporary ventricular support.
- Should be ready to support the hospitals' ECMO service as required.
